## Dantuluri Narayana Raju College (Autonomous) Bhimavaram, (A College with Potential for Excellence)

## **P.G DEPARTMENT OF ECONOMICS**

## M.A. ECONOMICS COURSE OUTCOMES

| S.<br>NO | Semeste<br>r     | Paper<br>Code | Course                                 | Course Objectives   |
|----------|------------------|---------------|--|---|
| 1        | Semeste<br>r I   | 101           | Micro<br>Economics<br>Analysis –I      | To understand to analyse how individual decision makers,<br>both consumers and producers behave in variety of<br>economic environments.   |
|          |                  | 102           | Macro<br>Economics<br>Analysis –I      | To understand the process of calculating national income,<br>identify its components, demonstrates circular flow of<br>income and understand the theories of employment,<br>meaning of consumption function relationship between<br>APC and MPC.  |
|          |                  | 103           | Quantitative<br>Methods –I             | To know basic notions of liner algebra, calculus,<br>optimization, probability and game theory understand<br>quantitative analysis of problem-and decision-making,<br>think critically about the uses and limitations of<br>quantitative methods. |
|          |                  | 104           | Public<br>Economics –I                 | To understand the nature of public goods, recognize the externalities as they relate to the public sector.  |
|          |                  | 105           | Indian<br>Economic<br>policy –I        | To understand the basic features of Indian economy resources in India, skill development mission.   |
| 2        | Semeste<br>r II  | 201           | Micro<br>Economics<br>Analysis –II     | Able explain the function of markets and prices, understand<br>to demonstrate marginal productivity theory of distribution,<br>theory of wages, identify different types of rent, theories of<br>interest and profit.                             |
|          |                  | 202           | Macro<br>Economics<br>Analysis –II     | To understand illustrate various versions of theories of<br>money, able to analyze different phases of trade cycles,<br>theories and inflation different types.   |
|          |                  | 203           | Quantitative<br>Methods –II            | To explain the assumptions of the classical linear<br>regression model, demonstrate understanding of and ability<br>to use distribution, chi-square, t and f distributions  |
|          |                  | 204           | Public<br>Economics –II                | To understand the basic government financing mechanisms,<br>Be cognizant of the burden, incentive and equity<br>implications of the various forms of taxation.  |
|          |                  | 205           | Indian<br>Economic<br>policy –II       | To develop students have knowledge on objectives,<br>achievements and failures of Indian five year plans, role of<br>NITI Aayog.  |
| 3        | Semeste<br>r III | 301           | Evaluation of<br>Economic<br>doctrines | To get knowledge and understanding at an advanced post graduate level of how economic thought evolved overtime.   |
|          |                  | 302           | International<br>Trade                 | To understand, at the level of formal analyses, the measure<br>models of international trade. Be familiar with, and be able<br>to critically analyze the main arguments for protection and<br>free trade.   |
|          |                  | 303           | Economics of<br>Education &<br>Health  | It is the ideal for postgraduates hoping to pursue a carrier in<br>health economics wish to develop skills and students<br>prepare for jobs.  |
|          |                  | 304           | Industrial                             | To understand the relationship between industry and   |

|   |                 |     | Economics                                 | economic development, the effects of globalist ion on  |
|---|-----------------|-----|---|--|
|   |                 |     |   | Indian industry.   |
|   |                 | 305 | Labour<br>Economics                       | To understand the basic concepts of labour economics. To<br>assesses labour market developments, labour market<br>policies.  |
| 4 | Semeste<br>r IV | 401 | Economics of<br>Growth and<br>Development | To understand the concepts of economic growth and<br>development, determinants and measurement of economic<br>development theories of economic growth, growth<br>strategies.                   |
|   |                 | 402 | International<br>Finance                  | To analyze the institutional details of foreign exchange and<br>international money markets, apply theories and models<br>covered to the issue of optimal currency areas.                      |
|   |                 | 403 | Environmental<br>Economics                | To understanding and addressing complex environmental<br>issues. Apply systems and concepts and methodologies to<br>and understand interactions between social and<br>environmental processes. |
|   |                 | 404 | Demography                                | Apply demographic concepts and population theories to<br>explain past and present population characteristics to assess<br>the relationship between demographic change and policy.              |
|   |                 | 405 | Regional<br>Economics                     | To understand the regional economy and the regional level<br>of economic activity, the concepts of convergence,<br>divergence, the impact of innovations and R&D on regional<br>development.   |
